

## Euro Series In-Swing Casement & Picture

Nothing has more impact on the look of a house than its windows and doors. With this in mind, we created these elegant designs. The hardware is cleverly concealed to allow a simple, refined appearance, perfect for any décor. Operable and picture windows can be combined into multiple-unit assemblies. Whether you are renovating or building a new home, these vinyl windows will easily work for you.

This versatile tilt-turn design is three windows in one. Closed, it has the look and performance of a picture window. A turn of the handle allows it to tilt in from the top to provide the ventilation of a hopper design. One more turn and you have an inward-opening casement window that is easy to clean.

### In-Swing Features

- Fusion-welded sash & frame
- Multi-chambered design insulates well, reducing heat and sound transfer
- Concealed multi-point locks improve aesthetics and security
- 1" oa. dual pane and 1 5/16" oa. triple pane recommended

### The Perfect Blend of Performance and Aesthetics

Far Top Left: Extended eyebrow over twin casements over picture windows. All with white grids.

Left: Corner cut showing multiple chambers and 1" oa. dual pane IG unit.

Right: Exterior view of above left windows.
