### **IG Pricing Calculation Explanation:**

Width, rounded to nearest even inch, multiplied by height, rounded to nearest even inch. Multi Divide that total by 144. Multiply that total by square foot glass price, then round up to nearest penny.

Ex: 33 1/2" x 51 1/4" LoE 272/Clr IG

$34 \times 52 = 1768 / 144 = 12.27777 \times 104.36111$

**IG Price will be \$104.37**
