Almond (Int. & Ext.)

Tan

Clay/Dakota Sand

Espresso

Brown (Ext. only)

Slate Grey

Bronze (Ext. only)

Silver

All pricing reflects United Inch (UI) unless otherwise noted. UI = Frame Width + Frame Height

Egress Window Information

The minimum parameters must be satisfied: A minimum net clear opening of 5.7 square feet shall be provided; a net clear opening height of 24 inches shall be provided; and, a net clear opening width of 20 inches shall be provided.

The opening of the window must measure at least 5.7 square feet to be approved as an egress window. To determine the square footage, multiply the window's clear opening width in inches by its clear opening height in inches, then divide by 144. (144 is the total square inches in 1 square foot.)

Other requirements:

There must be a maximum of 44 inches from the floor to the finished sill to ensure people will be able to get up to the window if they need it as an escape route. The window must have a **minimum clear opening height of 24 inches and a minimum clear opening width of 20 inches**. You can't use a window with both of these minimums because they do not total the 5.7 square feet required. The window well must provide a minimum of a 3' by 3' unobstructed opening. If the window well is deeper than 48 inches, a ladder or stair must be provided. Confirm with local building codes regarding egress requirements, your area may have different local codes.

Casement (Using Egress Hardware)

Width = Frame width – 7 1/4"	
Height = Frame height – 5 3/8"	
Example	Frame size is 27 1/4" x 47"
Width	27 1/4" – 7 1/4" = 20"
Height	47" – 5 3/8" = 41 5/8"
20" x 41 5/8" = 832.5 / 144 = 5.78 sq. ft.	

Euro Series In-Swing Casement

Width = Frame width – 6 7/16"	
Height = Frame height – 6 7/16"	
Example	Frame size is 30" x 42"
Width	30" – 6 7/16" = 23 9/16"
Height	42" – 6 7/16" = 35 9/16"
23 9/16" x 35 9/16" = 837.95 / 144 = 5.82 sq. ft.	

Double Hung

Width = Frame width – 4 3/8"	
Height = Frame height / 2 – 7"	
Example	Frame size is 39" x 63"
Width	39" – 4 3/8" = 34 5/8"
Height	63" / 2 – 7" = 24 1/2"
34 5/8" x 24 1/2" = 848.3 / 144 = 5.89 sq. ft.	

Double Slider

Width = Frame width / 2 – 5 1/4"	
Height = Frame height – 4 1/4"	
Example	Frame size is 60" x 38"
Width	60" / 2 – 5 1/4" = 24 3/4"
Height	38" – 4 1/4" = 33 3/4"
24 3/4" x 33 3/4" = 835 / 144 = 5.80 sq. ft.	

Single Hung

Width = Frame width – 4 1/2"	
Height = Frame height / 2 – 6"	
Example	Frame size is 40" x 60"
Width	40" – 4 1/2" = 35 1/2"
Height	60" / 2 – 6" = 24"
35 1/2" x 24" = 852 / 144 = 5.91 sq. ft.	

Single Slider

Width = Frame width / 2 – 4 1/2"	
Height = Frame height – 4 1/2"	
Example	Frame size is 56" x 40"
Width	56" / 2 – 4 1/2" = 23 1/2"
Height	40" – 4 1/2" = 35 1/2"
23 1/2" x 35 1/2" = 834 / 144 = 5.79 sq. ft.	

Minimum Sizes to Meet 5.7 Sq. Ft.

Euro Series In-Swing Casement *	30" x 42"
Casement (Egress Hardware) *	30" x 42"
Casement (Non-Egress Hardware)	31" x 45"
Double Hung	39" x 63"
Double Slider	52" x 45"
Single Hung	39" x 60"
Single Slider	50" x 45"

* Minnkota Windows stocks these sizes.
