Euro Series Tilt & Slide Patio Door

## PRODUCT BULLETIN

### **Euro Series Tilt & Slide Patio Door**

We're excited to announce the availability of our new Euro Series Tilt & Slide Patio Door to the ever-growing list of European-style windows and doors available to our customers.

The Tilt & Slide is a premium door solution for spaces that do not allow for inswing doors. The unique sash design tilts and slides parallel to the fixed unit with the touch of a finger. Compression-seal technology contributes to outstanding performance.

Available in white and all four woodgrain colors and over 8' 6" wide.

The 3-1/4" frame depth is the same as the Euro Series French Door. A finger-pull handle comes standard with sliding screen on the exterior of the operating sash. If a keyed-lock is desired, the unit will come without a screen.

The interior of the door has tracks for the operation of the active sash. The track at the top impedes application of 3/4" jamb and 1/2" drywall return.

1" oa. dual pane IG or optional 1-3/8" oa. triple pane IG available.

List price: \$27.50 per U.I. for white, \$31.50 per U.I. for any of the four woodgrains.
